Wiener Neustadt, 24.04.2025

This sample EPD was created based on the evaluation scheme of the EPD Guideline – Guideline for the calculation of formulation's single scores – and verified by the Institut Bauen und Umwelt e.V. (IBU), from the joint project of DBC –Deutsche Bauchemie e.V., the European Federation for Construction Chemicals (EFCC), FEICA, the Association of the European Adhesive & Sealant Industry and Industrieverband Klebstoffe e.V. (IVK) in the updated version (vs. 2022-08-05). EPDs can be used to incorporate the ecological aspect of construction products into the sustainability assessment of buildings.
