

BALCONY DRAINAGE PROFILE

- > weather and UV-resistant
- > colour-stable
- > decorative finish

Product description

High quality, drainable, grey powder-coated aluminium profile for the edge ending of tiles, boards and natural stone coverings. Optimum flow of moisture is ensured by the drainage holes. For elegant closure of open fronts of balconies and terraces when using drainage screeds, mortars and other drainage system or also for gravel aggregate.

Delivery format

Container	Outer packaging	Pallet
2.5 M / STK	-	8 STK

Storage

Can be stored frost-free, cool, and dry on wooden shelves in the unopened original container for 0 days

Processing

Processing

Lightly sand the substrate in the area of the terrace profile, so that no height differences occur. The balcony drainage profile is now laid in the seal with the moulded part and smoothed over. Sealing tape must be worked into the transition to other components to absorb potential heat expansion of the profile. Then the selected drainage system can be applied. Use Murexin external corners for elegant corner shaping or connectors and connector reinforcements are available for profile ends.

Technical data

Consumption

(Determined in standard climate, 20 °C/60% relative air humidity)

Rod length: 2.5 m 60 mm high

Substrate

Suitable substrates

Concrete
Cement screed, Anhydrite screed
Mastic asphalt
Gypsum plaster, Lime-cement plaster
Masonry
Gypsum plasterboard
Formwork-smooth concrete, Aerated concrete
Wooden materials

Not suitable for the adhesion of Murexin Uniplatte or polystyrene.

The substrate must be dry, frost-free, solid, weight-bearing, dimensionally stable, free of dust, dirt, oil, grease, release agents, and loose parts, and it must comply with the applicable technical national and European directives, standards, and "generally accepted rules of the trade".

Product and processing instructions

Material information:

- The properties of the material may be significantly altered if not processed within the ideal temperature and/or humidity range.
- Bring the materials to the proper temperature before processing!
- To maintain the product properties, do not add any foreign materials!
- Water dosing quantities or dilution information must be strictly adhered to!
- Check tinted products for colour accuracy before application!
- Colour consistency can only be guaranteed within the same batch.
- The environmental conditions significantly impact colour formation.

Environmental information:

- Do not process at temperatures below + 5°C!
- The ideal temperature range for the material, substrate, and air is +15°C to +25°C.
- The ideal humidity range is 40% to 60% relative humidity.
- Increased air humidity and/or lower temperatures may prolong the drying, setting, and hardening time, while lower air humidity and/or higher temperatures will speed it up.
- Ensure adequate ventilation during the drying, reaction, and hardening phase; avoid draughts!
- Protect against direct sunlight, wind, and weather!
- Protect adjacent components!

Tips:

- We recommend using a test surface first or a small area for initial, small-scale testing.
- Please observe the product data sheets of all MUREXIN products used in the process.
- Keep a genuine original container of the respective batch for later repair work.

The information provided reflects average values obtained under laboratory conditions. Due to the use of natural raw materials, the indicated values of individual deliveries may vary slightly without impacting the product suitability.

Safety instructions

This leaflet is based on extensive experience, is intended to convey the best of our knowledge, is not legally binding and does neither constitute a contractual legal relationship nor a subsidiary obligation resulting from the bill of sale. The quality of our materials is guaranteed within the framework of our general terms and conditions. Our products may be used by professionals and/or experienced and accordingly technically skilled persons only. Users are not released from inquiring in case of uncertainties or from rendering professional workmanship. We recommend using a test surface first or a small area for initial, small-scale testing. Naturally, it is not possible to describe or foresee all possible current and future uses and peculiarities. Information that is assumed to be familiar to experts has been omitted.

Please observe the current, technical, national and European standards, guidelines and data sheets regarding materials, substrates and the subsequent construction. Please contact us if you have any reservations or doubt.
