# From the foundation slab to the roof ridge

with the Special Seal **WD-1K**  
and the Special Sealant **WD Top+**

Sealing System

**It lasts.**

# MUREXIN Special Seal WD-1K

Liquid-applied roof & building seal

FOOD-SAFE

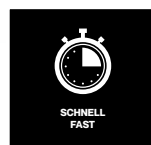

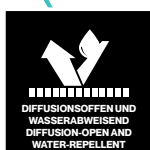

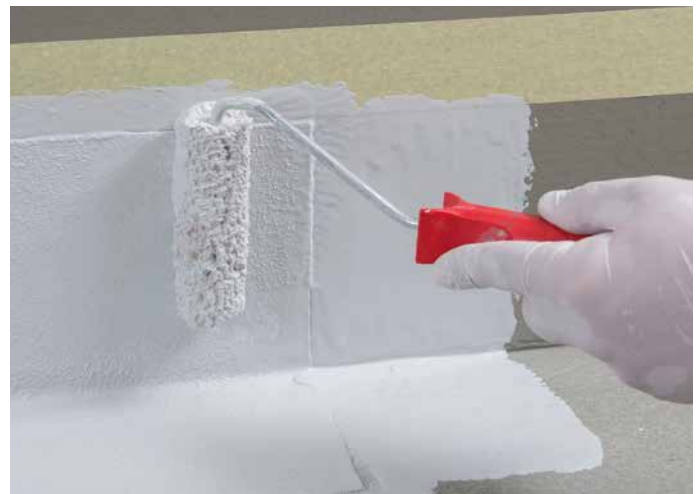

ETA in accordance with EAD  
030350-00-402

The innovative building and roof sealing can be used in a variety of ways, both indoors and outdoors: on absorbent and matt, damp surfaces, as well as on numerous non-absorbent surfaces. It is suitable as a liquid sealant for a wide variety of vertical and horizontal wall and floor areas of flat and pitched roofs, swimming pools, balconies, arcades, loggias, cisterns, fountains, bathrooms, commercial kitchens, plant rooms, pump sumps, evaporation channels, or for lift shafts, and even as a wind sealant for blower door tests in the area of connection points.

## Benefits

- single-component, odourless, solvent-free, isocyanate-free
- ETA in accordance with EAD 030350-00-402
- highly permeable
- root and rhizome resistant
- food-safe tested
- frost and de-icing agent resistance, plasticizer-free
- one product for both vertical and horizontal applications

For further information you  
can download the **Technical  
Data Sheet** here.

# MUREXIN Special Sealant **WD Top+**

The perfect complement to **MUREXIN** Special Seal **WD-1K**

**Ideal for pool  
renovations!**

To increase mechanical and chemical resistance, Special Sealant **WD Top+** is the ideal complement to Special Seal **WD-1K**. It protects the seal from commercially available water treatment products in continuously submerged areas.

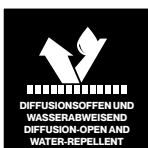

Special Sealant **WD Top+** can also be applied directly to concrete and protects it from damaging media, for example where sealing is not absolutely necessary.

The multi-talented Special Sealant **WD Top+** refreshes all roof coverings applied using a roll or airless process, such as metal roofs, concrete roof tiles, clay roof tiles or fibre cement panels.

## Benefits

- single-component, odourless, solvent-free, isocyanate-free
- frost and de-icing agent resistant
- splash protection; can also be in-filled with a spatula
- sealing resin for underwater areas
- refreshing roof surfaces applied using the roll or airless method
- no dirt adhesion due to low surface energy

For further information you  
can download the **Technical  
Data Sheet** here.
